Simultaneous Recording and Playback

*Record up to 64 channels of video with time lapse and event-based recording modes (including total of up to 16 IP cameras or 8 megapixel cameras). Record multiple video channels with simultaneous alarm conditions and motion detections.

Supports Megapixel Cameras

This system is integrated with Arecont, ACTi and IQeye megapixel cameras.

User-Friendly Operation

Settings and menus are designed for non-experts, so anybody can navigate the system without spending days learning how to operate it.

Multiple Picture Qualities and Resolutions

You can set each camera individually for resolution, compression, frame rate and recording events.

Multi-Zone Motion Detection

The systems support whole screen or user defined areas of motion detection, with several detection areas for each camera.

Remote Access

With RMS software you can connect to multiple sites, and each site can be connected with multiple users at the same time.

Scheduled Video Recording

Operate with 5 different recording modes, including alarm recording, scheduled recording, motion recording or combinations of each. Each camera and mode can be defined hourly, daily, or weekly.

Remote System Administration

You can remotely connect to the server through multiple network configurations, including LAN/WAN/ISDN or PSTN. Then navigate and operate all the system functions as if you were at the main system. The interface is the same remotely as it is at the server.

Local and Remote Pan/Tilt/Zoom Control

Control multiple PTZ camera formats, locally and from a remote location.

System Watchdog

In the unlikely event system freezes, the system's watchdog feature will automatically reboot the system.

Multiple Audio Channels

Monitor live audio, record, play back and back up audio on one or multiple cameras.

Integration Options

Integrated features such as POS and Access Control and other added modules make this system easy to use and a comprehensive solution!

HYBRID/NVR Software Features

Various Network Video Server Brands

- Connect with up to 64 Servers or IP cameras
- Automatic Network Video Server Search support
- Supports Audio, Sensors and Relays built into the Network Video Servers

Combining Analog and IP Video Streams

- Combined systems able to support up to 64 channels of video (including total of up to 16 IP cameras or 8 megapixel cameras)

Remote DVR software

- Uses the same GUI as the main DVR software

Integrated POS

POS-DVR provides visual awareness to reduce shrinkage and protect against business losses. Using POS-DVR you can directly integrate devices like POS, ATM, Access Control, etc.

- Display/hide transaction text messages on live view & playback
- Pre-defined transaction action code or word matching to search
- Up to 16 POS can be connected with DVR System, Using Serial Communication or TCP/IP Connection
- Auto-recording feature on transaction start
- Daily Transaction Count Report and Daily Sales Amount Report
- Adjustable POS text font, text color, text alignment on screen

Remote Monitoring

Remote Management Software

Internet Explorer-based WebRMS

Wireless PDA connection with the DVR Server

Optional Central Management System (CMS)

Supported PDA OS: Microsoft® Windows® Mobile™ 2003 Second Edition; Microsoft® Windows Mobile™ 5.0 or Higher

Note: call for compatibility information
